COMPANY PROFILE

ABOUT ASUS

ASUS, the world's top 3 consumer notebook vendor and the maker of the world's bestselling and most award winning motherboards, is a leading enterprise in the new digital era.

ASUS designs and manufactures products that perfectly meet the needs of today's digital home, office and person, with a broad portfolio that includes motherboards, graphic cards, displays, desktop PCs, notebooks, servers, multimedia, wireless solutions, networking devices and mobile phones.

Driven by innovation and committed to quality, ASUS won 3,886 awards in 2011 and is widely credited with revolutionizing the PC industry with the Eee PC™. With a global staff of more than 11,000 people and a world-class R&D team of 3,100 engineers, 900+ support centres worldwide, the company's revenue for 2011 was around US\$11 billion.

ASUS is the Top 3 Consumer Notebook Brand in the World

According to the latest IDC report (2011), ASUS notebooks are climbing the worldwide sales charts at an unprecedented pace, with sales outstripping those of companies who once dominated this market.

- The Top 1 notebook brand in Central and Eastern Europe
- The Top 2 notebook brand in South East Asia
- The Top 2 notebook brand in China
- The Top 3 notebook brand in Western Europe

ASUS is the No.1 Motherboard Brand in the World

- ASUS had shipped 420,000,000 motherboards since 1989
- One in every 3 PCs sold worldwide in 2010 was equipped with an ASUS motherboard

The mainboard is the key to the quality and reliability of the notebook PC, so you can be sure that ASUS' notebooks have the best quality and are reliable.

ASUS is a Top Information Technology Company in the World

ASUS is ranked top 10 in the Consumer Electronics category of "The World's Most Innovative Companies 2010" by Fast Company, a media publication that tracks the pulse of the web and tech industry.

ASUS is No.1 in Quality and Service

ASUS strives for perfection in all of our products and we consistently win awards for quality and innovation. This is reflected in the No.1 rank we have attained for product quality and services from the Wall Street Journal Asia.

ASUS received 3,886 awards in 2011

A testament to your commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organisations and IT journalists worldwide.

ASUS Green Technology

ASUS continues to lead the industry in the adoption of greener technology, and is the first in the world to achieve EU Flower Eco Certification for computers and EuP Certification for portable notebooks.

ASUS - A Top 2 Notebook Brand in South East Asia

Thank you for making ASUS a Top 2 Notebook brand in Southeast Asia. We remain committed to providing innovative products that deliver excellent quality, reliability and performance that enhance the computing experience.

VENDOR	RANK
ACER	1
ASUS	2
HP	3
Toshiba	4
Dell	5
Lenovo	6

Showing our strong brand recognition and trust, ASUS has been recognised as a top 2 consumer notebook brand in the South East Asia region.

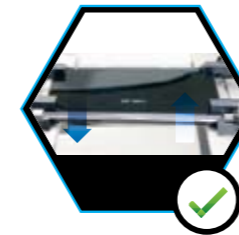

At ASUS, we aim to inspire and motivate. We continue to demonstrate our passion for technology and focus on quality to ensure that ASUS remains a global frontrunner in this new digital era. This is what Inspiring Innovation-Persistent Perfection is all about.

Extreme Testing for top-quality notebooks

ASUS notebooks are subjected to stringent tests that ensure each and every model is robust and reliable. Notebooks are placed under stresses not normally seen in everyday life to ensure they continue to deliver unparalleled performance, even in the most extreme conditions.

Twist Test

Notebook lids opened with one hand can cause screens to flex. The twist test assesses how well notebooks cope with this type of handling by twisting the entire chassis to extreme degrees.

Shock Test

Notebooks are likely to experience shocks during shipping and day-to-day use. So ASUS performs a variety of shock tests to ensure that each model can handle the rough and tumble of everyday life.

Vibration Test

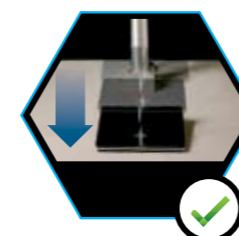

Shock is the one common laptop stress - vibration is another. The vibration test subjects notebooks to a range of vibration frequencies to ensure that both the outer construction and internal components are able to cope.

Hinge Test

Screen hinges are a potential weak spot on any notebook, so ASUS tests its designs by opening and closing its notebook lids at least 20,000 times to ensure their robustness.

Drop Test

A dropped notebook shouldn't mean a broken notebook and ASUS puts its models through a series of drop tests that measure how well they cope with life's little accidents.

Pressure Test

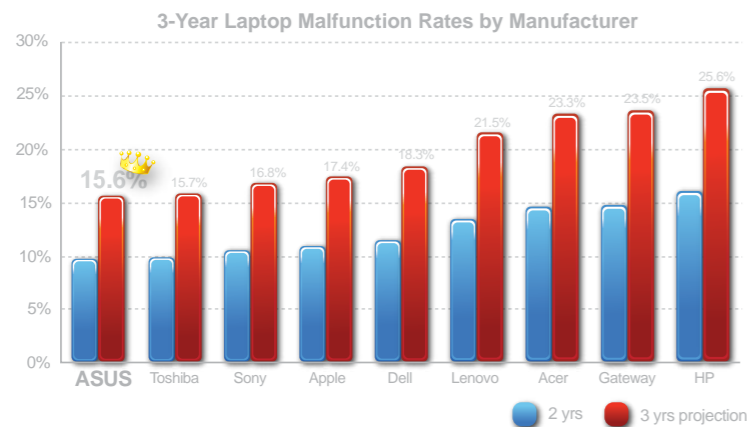

Notebook LCD screens are fragile and need to be protected by a sturdy lid. ASUS ensures that each display is well protected by subjecting lid designs to high pressure tests.

ASUS QUALITY

Survey of 30,000 Laptops Lists ASUS as Top in Reliability Rankings

SquareTrade, the largest independent warranty service provider in the United States, published a report that analyzed the failure rates of over 30,000 new laptop computers manufactured by the leading nine notebook brands over the past 3 years. A minimum of 1,000 notebooks from each brand were sampled.

With three year malfunction rates under 16%, laptops from ASUS are nearly 40% more reliable than HP, the worst performer in this study. HP, the industry leader, which shipped nearly 16 million laptops in the past year according to IDC, ranked dead last in this reliability study with over one-fourth of laptops expected to malfunction in three years. Gateway and Acer, the no. 2 maker of laptops, were also nearly unreliable as HP, with an expected malfunction rate of over 23% (page 6).

Source: www.squaretrade.com/pages/laptop-reliability-1109/
Square Trade, 2009/Nov/16th, Report "1 in 3 laptops fail over 3 years"

SquareTrade Report Disclaimer

- As there is no sharp line that divides the definition of a netbook and laptop computer, SquareTrade has used the price point of under \$400 to define the netbook category in this analysis
- Only malfunctions reported directly to SquareTrade are included in the data. Other malfunctions, including software issues handled directly by the retailer, problems associated with product recalls, and those fixed by software/firmware updates, may not be represented in this data
- We did not take into consideration purchase locations
- The document and all of its contents are provided as-is. SquareTrade has made efforts to ensure that the data and conclusions we present are correct, but makes no warranty, express or implied about the data accuracy of the data

“ In terms of brands, ASUS stood out as the most reliable manufacturer. Acer, Gateway and HP had failure rates significantly higher than the average. ”

ASUS QUALITY

ASUS Ranked No.1 in Reliability

Record-setting score of 1791 in RESCUECOM's Computer Reliability Report puts ASUS more than 1105 points ahead of nearest competitor.

RESCUECOM, the industry-leading computer repair experts in the United States, assessed the world's top computer manufacturers according to the number of calls made to the RESCUECOM CALL call centre vis-à-vis each company's market share, and ASUS far outshone the rest of the field with a disproportionately small number of calls requesting for help with its products. ASUS, the leader in PC innovation, quality and design, is now the clear leader in reliability as well, according to the latest RESCUECOM Computer Reliability Report released on August 30th, 2010.

ASUS was awarded a score of 1791 - a RESCUECOM record - placing it emphatically at the top of the table and prompting RESCUECOM to dub ASUS the "new leader in reliable personal computers."

"We are delighted with, but are not surprised by this result." said Cecilla HF, Director of Marketing, ASUS. "We have invested enormous resources in ensuring that our products are of the highest quality, and that our customers get the best after-sales service possible. We insist on perfection in everything we do - a philosophy that is captured in our new corporate slogan 'Inspiring Innovation · Persistent Perfection' - and are very pleased to see our efforts reaping dividends in the form of a smooth customer experience."

Position	Manufacturer	Reliability Score
1	ASUS	1791
2	APPLE	686
3	IBM/Lenovo	524
4	TOSHIBA	368
5	HP/COMPAQ	281
6	SONY	262
7	ACER	218

Source: www.rescuecom.com/blog/index.php/computer-support/the-rescuecom-computer-reliability-report-2nd-quarter-2010

* The RESCUECOM Reliability Report is based on two fundamentals: the quality of the computer and the quality of the support provided by the manufacturer.
** These reports are calculated in a simple and straight forward manner: the number of computers an individual manufacturer ships (and therefore their market share) is weighed against the number of calls RESCUECOM's computer repair specialists receive for that same manufacturer.

ASUS QUALITY

Marks in History

ASUS notebooks have been tested in the most harsh conditions and the most exotic locations. Many of these incredible actions have become the stuff of legend. We detail the accomplishments that have left an indelible mark on history here.

In outer space

ASUS Notebooks Experience Zero Defects throughout a 600-day Space Mission.

Two ASUS notebooks were selected by R&K—a major supplier of computers and electronics for aeronautic missions to outer space—to provide astronauts with dependable computing during a mission on the MIR Space Station. Both notebooks experienced zero defects throughout the 600-day period. "The ASUS notebooks never overheated like some of the ones made by other companies," said Sergei Avdeev, the Russian astronaut on the space mission. "Thermal flow in space and on Earth is completely different. Only notebooks with the best heat dissipation solutions can survive continuous operation. We turned the notebooks on in the morning and left them on all day without a problem."

In the air

ASUS Notebooks Help NRMA CareFlight Helicopter Rescue Unit Save Lives.

NRMA CareFlight, an emergency medical and rescue helicopter unit that serves the people of New South Wales of Australia, uses ASUS notebooks in different sectors of its service, including aviation, medical treatment and administration. ASUS notebooks play a particularly critical role in CareFlight's program aimed at improving survival rates in accidents with severe head traumas. With the help of mobile computing, CareFlight can deliver a medical team on scene faster than a local ambulance, and this new program is expected to reduce deaths from head injuries by 33%. "All our pilots have been very impressed with the ASUS M5 laptops and amazed at their ability to withstand the vibration of the aircraft," said Mark Lees, Community Relations Manager of CareFlight. "We are now ready to install ASUS M5 laptops in all our aircraft and to link them to the onboard navigation computers."

On the road

ASUS Notebooks Perform Flawlessly During a Grueling Off-road Race.

ASUS notebooks were chosen to perform critical tasks during the PATAGONIA 2000 race, which saw the computers used in hot deserts and snow-covered mountains. One of the key tasks entailed serving as navigation devices, which they excelled at due to their built-in satellite GPS functionality and ability to display dynamic maps. They also served as communication centers, enabling both email communication and bidirectional video conferences. "Needless to say, ASUS computers survived the severe conditions of this strenuous voyage well, without a single flaw," said Aviv Shweky, the race organizer.

On the world's highest peak

ASUS Notebooks Are the First Reach the Top of Mount Everest.

The harsh conditions at the peak of the world's highest mountain may faze other notebooks, but not ASUS'. A slew of ASUS notebooks—including the U5, S6 (both the leather and bamboo editions), W7 and U1—were chosen to accompany a team of mountaineers on an expedition to reach the top of Mount Everest, known the locals in Tibet as the Qomolangma Peak. Upon reaching the base camp at an elevation of 5,000m, only ASUS notebooks continued to operate. Other notebooks failed to boot up due to the extremely low ambient temperature. The ASUS U5 even made it to the top of Qomolangma Peak at a staggering height of 8,848.43m, thanks to expedition leader Captain Wang Yongfong who carried it along with him as a tribute to eco-friendly technology—making ASUS notebooks the world's first to reach the top of Mount Everest.

At the ends of the earth

ASUS Notebooks Conquer the North and South Poles.

ASUS notebooks have proven on separate occasions to function perfectly in the freezing temperatures of the North and South Poles. The most memorable of these expeditions took place on December 16, 2003, when acclaimed mountaineers Shi Wang and Jian Liu set out on their journey to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet and where temperature drops well below -100°F. Wang and Liu each brought along an ASUS S200N notebook to record and share their experiences during the expedition. The S200N met their needs perfectly: it was lightweight and compact, had a large hard disk capacity and could handle the rigors of ascending a mountain. "They worked without a glitch under extreme conditions and severe weather. It was nice to have a notebook I could count on in situations where malfunctions are not tolerable," said Wang.

ASUS WINNING AWARDS

ASUS won 3,886 awards in 2011

A testament to our commitment to innovation, design and quality, ASUS garnered a total of 3,886 awards from prestigious technology organisations and IT journalists worldwide.

What's new in

Top 6 Hotmail Tips

Hotmail Tip 1

Sweep unwanted mail out
Windows Live Hotmail helps you get rid of unwanted email with the Sweep menu.

Step 1 : Spot a sender whose message you want to sweep out

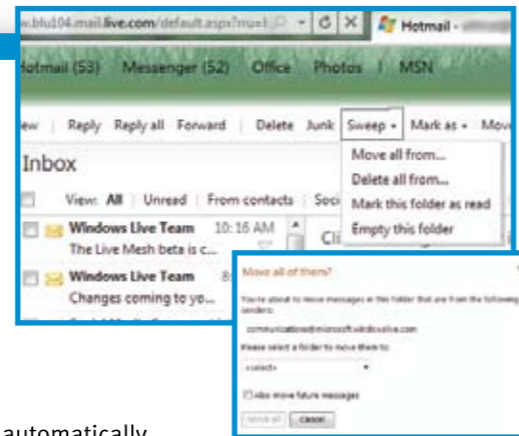

Select the check box next to message from that sender.

Step 2 : Click Sweep

You can choose to move or delete all the messages from the sender.

Step 3 : Don't bother with this again

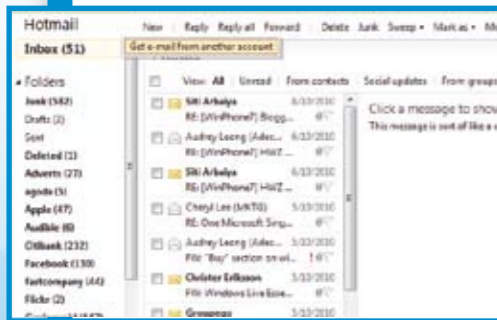

Just select the box to move or delete future messages from the sender automatically.

Hotmail Tip 2

View and filter your messages quickly

With one click, you can view and filter your messages by popular categories.

Quick View :

Click a category under Quick views to see all the messages that match it. For example, click Photos to see all the messages that have photos attached.

Filters :

Click one of the filter categories that appear above the message list to see all the messages that match it. For example, click Unread to see all the messages that you haven't read yet.

Hotmail Tip 3

Manage your email

Set up Windows Live Hotmail to access multiple email accounts, like Gmail, AOL Mail, and Yahoo! Mail. Then, you can send and receive email from all of these accounts right in Hotmail—and get more done in less time.

Step 1 : Add an email account

In the left pane, next to inbox, click the Tools icon, and then click Get email from another account.

Step 2 : Enter your account info

Click Add an email account, type the email address and password for the account you want to add, and then follow the instructions on your screen.

Hotmail Tip 4

View photos and videos in your inbox

By using Active View in Windows LiveHotmail, you can view photos and videos you receive right in your inbox, without leaving Hotmail.

Viewing Photos :

When someone sends you photos or a link to a photo album, you see thumbnail images of the photos, and you can even view a slide show right in the message.

Viewing Videos :

When you receive a link to an online video, you can click the video to play it in the message.

Hotmail Tip 5

Chat from your inbox

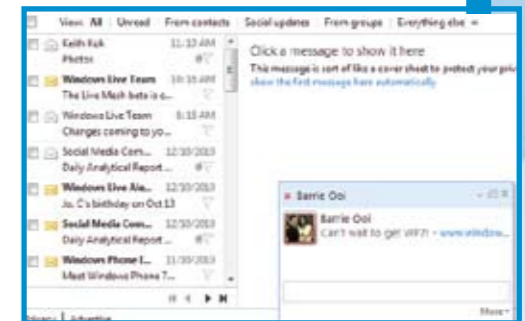

Now you can chat with your Windows Live Messenger contacts without even leaving your inbox in Windows Live Hotmail. See who's online and have instant conversations all in one place.

Step 1 : See Who's online

In the left pane of your inbox, under Messenger, type a name in the Search contacts box to find a contact and see his or her status.

Step 2 : Start to chat

Point at a contact to see a list of messaging options—or just click the contact to open a Messenger window and send an instant message.

Hotmail Tip 6

Send photo

Share your photos on Windows Live SkyDrive by simply sending an email message from Windows Live Hotmail. Your friends and family will be able to view slide shows of your photos and download them from SkyDrive without filling up their inboxes with large photo attachments.

To share photos on SkyDrive :

When someone sends you photos or a link to a photo album, you see thumbnail images of the photos, and you can even view a slide show right in the message.

1. Click New to create new message.
2. Type an email address and subject.
3. Click Photos, and then click Create album on SkyDrive.
4. Select the photos that you want to create an album with, and then click Open. Hotmail will upload and save the photos to SkyDrive.
5. Type a message, and then click Send.

* Note : You need to install Microsoft Silverlight to use this feature. This feature is not yet available in all countries or regions.

ASUS EXCLUSIVE INNOVATIONS

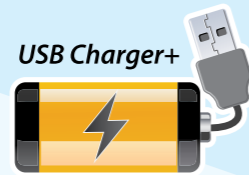

ASUS not only provides you with hardware solutions but also softwares that enhance your overall computing experience.

ASUS Instant On

Powered by SHE II Technology
Super Hybrid Engine II incorporates elements of its SHE predecessor and builds on the vitals of better battery performance. Instant On allows notebooks to resume in under 2 seconds* and stay in standby for up to 15 days*. Importantly, should battery levels fall below 5%, data is automatically saved and secured on the hard drive*.

*Resuming from hibernation on a mainstream notebook can typically take 30-60s. Normal standby time before battery drains on mainstream notebooks is 3-5 days.

ASUS USB Charger+

Quick charge even when powered off
Recharge faster no matter what mode your notebook is in and regardless of connection to wall sockets. USB Charger+ works all the time right from the battery!

Reduce charging times by half
USB Charger+ recharges your devices twice faster than a normal USB port.

ASUS USB 3.0

Super fast transmission speeds
ASUS notebooks are the first to feature USB 3.0. It delivers transfer speeds of up to 5Gbps, or up to 10 times that of current USB2.0 standards. This allows for faster transfers of large files like HD movies. Devices even recharge faster with 900mA charging; while USB 3.0 incorporates some environmentally-friendly features that save energy – it puts devices in idle or shuts them down when not in use.

SonicMaster Technology

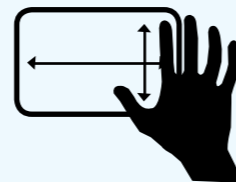

Audio by Bang & Olufsen ICEpower®
Brand new ASUS notebooks cater to audiophiles desiring superior sounds. ASUS has done this by fusing advanced hardware and software in a pioneering approach to mobile audio.

30 Days Bright Dot Return

One month servicing/return

ASUS stands by their notebook LCD panels, offering a one month servicing/replacement of the panel from time of purchase should the panel have any bright-dot.

Intuitive Multi-Touch Touchpad

The multi-touch touchpad allows you to easily scroll through web pages and pinch-zoom in and out of images.

Video Magic Technology

Experience vivid visuals with ASUS Video Magic

ASUS Video Magic is a complete hardware and software video solution. The GPU processes data at a much faster rate, enabling it to handle most graphics intensive tasks with relative ease. True Theater software upscales DVD-quality video to Full HD. ASUS Splendid technology optimizes media files, reducing noise and improving conversion rates for sharper, more vivid images with better contrast, brightness, skin tones and color saturation across all video applications.

ASUS AI Recovery Burner

Never forget to burn your recovery discs

There's no doubt that recovery DVDs are an essential asset, should things go wrong, as they can restore the entire system, including drivers and utilities to its original factory fresh state. However, most users forget to make them until its too late, so ASUS has takemn its AI Recovery Burner software to gently remind people that they need to pop a disc in. If that disc is lost or damaged, then a new one can be created at any time, with ASUS simple one click interface.

Selected models only.

ASUS COMPELLING RANGE

Notebooks that exceed your expectations

EXTREME GAMING SERIES

The fastest processors and most powerful graphics, combined with striking design make the Extreme Gaming Series a must for anyone who wants to game on the go.

ASUS K Series

Your Colour, Your DNA

Life's vibrant and so are you. Choose a colour that reflects who you are. ASUS K Series notebook with a sturdy aluminium metal frame is available in a variety of colours including passion red, chilli blue, seduction pink, party gold, urban green and simplicity white. ASUS K Series notebook feature Intel® 2nd generation Core™ processors and discrete NVIDIA graphics to propel your computing. The exclusive IceCool technology will also keep palm rest chilled so you stay comfortable even during extended usage.

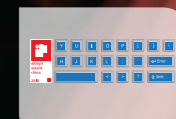

Keep Palm Rest Cool
Palm rests stay below body temperature, so they feel cool even during the longest typing sessions.

Palm Proof Technology
Touch pad will be automatically disabled when touched by your palm area, which helps to prevent typing errors.

Scratch Resistant
Strong yet elegant multi-colour aluminium textures personalise the PC experience.

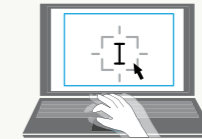

Chiclet Keyboard
The chiclet keyboard features wide anti-dust keys that provide a comfortable feel even after extended periods of typing.

ASUS IceCool Technology

Heat pipes and vents combine with an exclusive dual-sided motherboard design to place hot components on the underside. This helps lower operating temperatures, and ensures palm rests and typing surfaces stay cooler. Using the notebook remains comfortable even during the longest computing sessions.

Palm Proof Technology Prevents Accidental Input

Unique smart detection distinguishes between the contact surfaces of palms and fingers to prevent inadvertent cursor movements during typing, plus Windows® can automatically disable the notebook touchpad when an external USB mouse is connected for a more responsive setup. This feature can be turned on and off by users easily, allowing flexibility.

IF Award-winning Ergonomic Chiclet Keyboard

The elegant IF-award winning chiclet keyboard features large key cap gaps and sturdy buttons that make it easy for users to type accurately and comfortably. The anti-clust keyboard design also prevents the accumulation of dust that may cause harm to its internals.

2 seconds Instant On
Always instant on in 2 seconds with up to 2 weeks standby time

Quick charge, even when powered off
Exclusive Quick Charge technology, which can charge your peripherals like cell phones, even when the laptop is turned off.

ASUS SonicMaster Technology
Incredible audio performance co-developed with Bang & Olufsen ICEpower® with lifelike surround impact

1600 x 900 resolution with 450 nits (UX31 only)
World's first notebook with 450 nits panel (LCD TV level). Making dark areas clearer with light areas stand out in wild details

World's first notebook with SATA 3.0 6GB/s SSD
Reduce power consumption while expediting boot up, so users save time and energy

USB 3.0
Transfers data and HD multimedia content up to 10X faster than USB 2.0 for speedier file sharing and data backups

The Incredible Ultrabook™. Inspired by Intel.

Incredible Responsiveness: Smartphone-like experiences with 2-week standby time

One of the key advantages of the ASUS ZENBOOK™ is its smartphone-like spontaneity and always-on design. Regardless of how long the Ultrabook has remained in its standby mode, it can resume in just 2 seconds, thanks to the exclusive ASUS Super Hybrid Engine II technology. In effect, this means users have no reason to shut the ASUS ZENBOOK™, eliminating the need for lengthy boot-ups. It can stay in standby mode for up to 2 weeks, and the instant on functionality automatically backs up data to the SSD, should the battery level drop below 5%, eliminating the risk of data loss due to a drained battery.

Incredible Performance with USB 3.0 and SATA 3.0 6GB/s

ASUS is proud to deliver the world's first ultrabook with SATA 3.0 6Gb/s solid state storage, making for an amazingly smooth and fast computing experience. ASUS ZENBOOK™ models use an SSD for storage instead of a conventional mechanical hard drive which reduces power consumption while expediting boot-ups. SSDs are also less susceptible to failure and environmental hazards, making them better for portable use.

	PCMark Vantage score (1,024 x 768)	Continuous video playback battery life test	Boot-up time	Wake-up time

BEST THIN & LIGHT LAPTOP

T3 ★★★★★

This is perhaps the best Windows Ultrabook available today, and by golly it costs almost \$200 less than the Macbook Air.

MULTIMEDIA SERIES

ASUS N Series HEAR THE INCREDIBLE, FEEL THE POWER

Audio by Bang & Olufsen ICEpower®

SonicMaster premium with Max Audio 3.0 delivers:

Crystal clear sound

Every note and nuance comes across to listeners in pure fidelity, with no compromise.

Wide frequency

SonicMaster retains a professional-grade frequency range, much like stand-alone hi-fi systems.

Overall power upgrade

The amplifier in SonicMaster-certified notebooks receives much higher voltage than the norm for notebooks, enabling playback at significantly higher volumes.

ASUS SonicMaster Technology
ASUS worked together with Bang & Olufsen ICEpower® to deliver the exclusive SonicMaster Technology - a combination of advanced hardware and software designed to deliver an immersive audio experience.

2 seconds Instant On
Have your PC always boot in just 2 seconds for up to 15 days on standby, while never risking the loss of your data. The new N series Instant On technology keeps the data ready-to-go in memory so you never have to wait again. Meanwhile, it automatically backs up the data securely to disk.

Quick charge, even when powered off
ASUS new N series laptop is fitted with two USB 3.0 ports for superspeed performance that's 10X faster than existing USB 2.0. One of those ports feature exclusive Quick Charge technology, which can charge your peripherals like cell phones, even when the laptop is turned off

Cleare and fluid video recording
The integrated HD camera is designed to provide crisp, clear and fluid video recording for video calls and conferencing or home movie creation, even in low-light situations
